2 Report of the Academic Standing Committee
for the General Council Meeting on 6 February 2021
Convener of the Academic Standing Committee: Professor Stephen Hillier

The Academic Standing Committee continues to focus on student and staff wellbeing, and academic quality, in the context of the Covid-19 pandemic. Meetings were held during Semester 1 with Professor Tina Harrison (Assistant Principal Academic Standards and Quality Assurance), Fizzy Abou Jawad (EUSA VP Education), and Dr Jon Turner (Director, Institute of Academic Development), to be briefed on relevant issues.

A primary response to the pandemic has been University-wide introduction of a hybrid model of education and assessment combining digital and person-to-person components. The Edinburgh Hybrid Teaching Exchange has been set up to facilitate easy student transition between modalities. Support is provided for students and staff through thematic workshops, online resources, blogs, etc. The Exchange joins up the cross-University online teaching community and encourages shared expectations and experiences, including mental wellbeing and resilience. Students have expressed some concerns about the lack of live classroom sessions. However, most appreciate the effort and commitment from teaching staff, as referenced in an open letter from EUSA to the Principal about concerns over Teaching and Learning.

The shift to hybrid teaching has been generally well received, but provision is patchy, and a more inclusive learning environment is required to avoid individual feelings of isolation. Accessibility and inclusion, assistance for students and staff, and cross-University communications are ongoing concerns. Worries about academic space, travel services, accommodation, personal finances, isolation, staff burnout, mental health, etc. have also surfaced. International student support is a particular priority.

The ASC is tremendously impressed by the manner in which staff and students have come together to cope with these issues. Future provision of hybrid teaching will clearly need to be carefully managed in the light of post-Covid realities.

3 Report of the Finance and Services Standing Committee
for the General Council Meeting on 6 February 2021
Convener of the Finance and Services Standing Committee: Dr William Duncan

FSSC’s remit covers what could be termed ‘the bureaucracy’ - the underpinning professional support to those responsible for management, teaching, research and knowledge transfer. The quality of that underpinning support has played a key role in coping with the challenges of the pandemic.

On 19 November 2020, Gavin McLachlan, Vice-Principal and Chief Information Officer and Librarian gave a most impressive overview of the work of the Information Services Group. They are performing an exemplary and transformational role, enabling the University to cope with the current pandemic crisis in ways unimaginable only a few years ago and supporting the Adaptation
and Renewal Team. The digital estate is now as important as the physical estate. Their work will place the University in a leading position by being at the forefront of technological innovations that deliver a world-class user experience for staff and students.

On 13 January 2021 the Director of Finance, Lee Hamill, gave an excellent, re-assuring presentation about the Annual Report and Accounts for the year to 31 July 2020. This comprehensive, well-illustrated report fulfils an essential statutory function, as well as being a key communications document aimed at a broad audience, including members of the General Council.

Despite the disruption and changes caused by the pandemic in the final 4 months of the reporting period, it was gratifying to see that:

- The Operating Surplus was £48M. Although 22% less than in 2019, at 4% of turnover this is within the normal target range.
- Income continued to grow despite lost revenue from student accommodation and conference activities.
- Although there were additional costs as a result of the Covid crisis, these were partly offset by reduced travel expenses and heating/lighting costs.

Due to significant volatile movements in non-cash provisions for potential pension liabilities which are required to be shown in the Consolidated Accounts, these appear to show an even more favourable outcome, but this is misleading. The Operating Surplus is a much more accurate indicator of the sound financial performance in 2019/20.

The full year effect of the pandemic will be reflected in the Accounts for 2020/21. This will be another challenging year, but it was re-assuring to know that the University went into it from a sound financial position and this is expected to continue, despite areas of greater risk e.g. reduced overseas student fee income.

4 Report of the Public Affairs Standing Committee
for the General Council Meeting on 6 February 2021

Convener of the Public Affairs Standing Committee: Ms Candice Donnelly

Having chosen the theme of communication for the 2020-21 session, the Public Affairs Standing Committee has had a packed agenda for the first half of the year.

At our first meeting on September 24th, 2020, we were joined by Theresa Merrick, Director of Communications & Marketing, who highlighted the critical role played by communications in the University’s response to the coronavirus crisis. Theresa updated the Committee on some of the specific activities that the University has undertaken during the pandemic, such as the Covid-19 response microsite and the adaptation and renewal programme. These initiatives both communicate practical updates to staff and provide a platform to showcase the world class contributions being made by the University’s staff, students and alumni – which are always very inspiring to read.

The University has been engaging with broader stakeholders, such as the other Edinburgh universities, the City of Edinburgh Council, NHS and Police Scotland, to facilitate city wide collaboration on student issues. It is clear that the University is aware of the increased focus on the
civic role of higher education institutions, and is keen to be a powerful partner within the City and to encourage students and alumni to lead positive change.

PASC heard more about this role at our second meeting on November 11th, 2020, when Stuart Tooley, Community Relations Manager in the Communications & Marketing team, gave an eagerly anticipated presentation on the new Community Plan.

Stuart described how the University’s Strategy 2030 emphasizes the importance of community to the University’s long term success. The Community Plan features 32 commitments across five categories, and will form an anchor for University activity over the next five years. Some ideas are already in action whereas other community outreach programmes are ready to start once the Covid-19 restrictions are lifted. As the plan moves into its next stage of execution, Stuart’s team will be developing specific KPIs to establish reporting goals and measure performance.

PASC was particularly pleased to hear that the Community Plan includes a specific commitment to work closely with alumni to benefit from their connections, expertise and availability as volunteers – Business Committee feedback had been influential in forming this commitment. Upcoming PASC meetings will feature speakers from Development & Alumni and the Futures Institute, and we hope to use these sessions to consider how we can assist with alumni engagement and provide opportunities for General Council members to contribute to the University’s community strategy.

In terms of the General Council’s own communication strategy, volunteers from the Business Committee provided feedback on the latest version of the draft website during a recent workshop session. The General Council office is now working with Information Services to update the website to reflect these suggestions and other technical changes. We expect to be able to provide a further update on progress to General Council members at the Half Yearly Meeting in February.

Unfortunately, it looks like it will be some months before General Council members are able to meet in person again. PASC also continues to meet virtually, but receiving updates on other communication initiatives within the University has been invaluable as we assess how we can improve our engagement with members. We look forward to continuing these conversations over the remainder of the year.

5 Report of the International Affairs Standing Committee
for the General Council Meeting on 6 February 2021

Convener of the International Affairs Standing Committee: Ms Krystyna Szumelukowa

The International Standing Committee (ISC) concluded its report for Annex 2020 by “looking ahead in 2020 and beyond to examine the university’s engagement in Europe and China and the contribution that can be made by international alumni clubs of which there are many”. On 31st January 2020, the day the UK left the EU, the ISC met with representatives of alumni clubs in London and Brussels and on February 6th Professor Drew Scott, International Dean for Europe, and Helen McMillan, Regional Director for Europe provided the ISC with an overview of the university’s engagement within Europe.

We did not know then that on Midsummer’s Day we would be meeting for the first time on Zoom to hear from Alan Mackay, Director of Edinburgh Global, to hear how the university was managing
the Covid-19 emergency; preparing for the return of students in the next academic year; and adapting to the uncertainties of both a post Covid-19 and post Brexit world. The raft of new restrictions and regulations would apply not only to international students and staff in learning, teaching and research but also to home students whose courses and programmes would normally include an international component. Regrettably also, the June 2020 Half Yearly meeting with its focus on China could not take place. But, in facing these challenges, the university started from the strong position of being rated 20\textsuperscript{th} on the planet by QS, the provider of global higher education analytics.

The corona virus crisis and the final withdrawal of the UK from the EU combined to accelerate a review of the future direction of travel for the university in its global context. At the ISC 8\textsuperscript{th} October meeting, Professor James Smith, Vice Principal International and Professor of African and Development Studies, provided an update on the response to the challenges. Communication and recruitment procedures had been strengthened to secure global talent and to find ways to fund international learning and research opportunities for students and staff.

The 2020 Edinburgh Global Strategy has a strong regional focus. Its strength lies in the understanding of different engagement strategies in the different world regions. An intensive review will take into account the acceleration of universities in South East Asia in the global league tables which will result in a widening of student choices, simultaneously restricted by financial burdens and less freedom of movement. The number of students from China will decline. The objective of the review will be to focus on fewer strategic partnerships and bilateral connections; to support collaborative research and learning; and to promote the development of transnational education.

The details of the review were presented to the ISC on November 23\textsuperscript{rd} by Derek MacLeod, Head of Global Partnerships. A new database encompassing 400 live agreements across 65 countries and 250 institutions is being established to improve on their governance with new online systems to secure the management of risk in internationalism, which includes the protection of reputation and intellectual property, cyber-attack and travel for students and staff.

The regional reviews will not only evaluate the risks but also the opportunities to look at new qualification pathways through transnational education and collaboration in research. A new China Strategy Group has been established. Strategic partnerships are being examined across North America, South Africa and Australia. UNA Europa is an exemplar of collaboration across Europe in response to Brexit. The review presents an opportunity for the soft power of alumni hubs across the globe to support the university’s partnerships, networks and alliances, thereby strengthening academic and cultural ties.

The ISC will come full circle in January 2021 with the return of Professor Drew Scott and Helen McMillan accompanied by Dr. Chad Damro, who will have taken over as International Dean (Europe) by the time of this February 2021 Half Yearly meeting. Needless to say, the topic is the Brexit deal approved in late December 2020. The loss of ERASMUS has hit the headlines. The ISC will learn the full effects of the Brexit deal on the university’s participation in Europe at a time when Covid-19 still dominates.

The ISC wishes to thank all the university staff who have contributed to our meetings and shared information with us throughout this most difficult year. Their commitment to the university is without question and their efforts outstanding.
6 Meetings of the Business Committee

The Committee has met online twice since its last Report was published, viz. 15 October 2020 and 3 December 2020.
